# “How Does Your Garden Grow?”

Spring is a wonderful time to experience the magic of watching seeds sprout and grow. **BARNEY & FRIENDS** presents these experiences for children and adults to do together. The children will learn that plants grow from tiny seeds; that plants need soil, water and sunlight to grow; and that growing takes time. Watch **BARNEY & FRIENDS** on WVPT at 10:00 a.m. for morning entertainment and other learning opportunities.

## Seed Experiment

Plant three kinds of seeds in three separate cups. Predict which one will sprout first, which will grow tallest and which will grow fastest. Care for the plants each day; measure and record the heights as they grow.

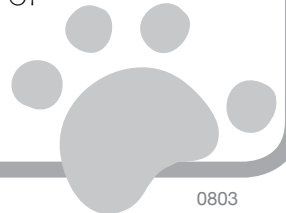

## Plant Seeds

Fill a clear plastic cup 2/3 full with potting soil. Drop in a seed (lima bean, marigold and zinnia are good choices) and cover it with more soil. Water lightly. Make sure the cup is placed in a warm, bright area. Have fun guessing how many days it will take for the seed to sprout. Check on the plant daily.

## Sprouting Carrot

Cut off the top (large) end of a carrot and place it in a shallow dish of water near sunlight. Watch the carrot top sprout in a few days. Older children can count the number of days it takes for the carrot to sprout.
