

**WVPT/WVPY Quarterly List of Programming  
Providing the Most Significant Treatment of Community Issues  
("Issues List")**

**2nd Quarter 2017  
07, 2017 –09, 2017**

In the past quarter, WVPT continued in its longstanding efforts to provide programming on issues of concern to our community. These issues include those concerning public policy, politics, community current events, health, the economy, and national developments of a local and regional 40 county coverage area.

The programs that provide the most significant treatment of community issues are described below. The remainder of the Issues List consists of:

- each issue addressed by WVPT in the preceding quarter; and
- The titles of the programs that provided the most significant treatment of these issues, as well as a description of each program (including its airdate, the time at which it aired, and the duration of the program).

Program	Day	Time	Description
Living in Virginia	Various days and times throughout the quarter. See schedule list below.		Locally produced program touching on the lifestyle and cultural issues living in the Commonwealth
Road Trip to History	Various days and times through-out the quarter		The "Road Trip to History" series is a spellbinding journey through the communities, history, and events that shaped the heartland of the Shenandoah Valley, as well as the entire Appalachian region.
Virginia Farming	Regular Schedule Friday Saturday Sunday	7:30 – 8:00 p.m. 12:00 p.m. Saturday 11:00 a.m. Sunday	Locally-produced program with coverage of farming issues of interest to the local community.

ANTHEM tells the story behind Francis Scott Key's "The Star-Spangled Banner," the song famously penned after the relentless bombardment by the British of Fort McHenry during The War of 1812. Historians and music experts discuss the Colonial-era songs and events that influenced Key to write what would become the U.S. national anthem. ANTHEM also reveals interesting facts about Key's upbringing and religious leanings while tracing the origins of the song. During the program, the U.S. Naval Academy Glee Club and St. John's College Chorus give voice to this stirring and elegant song, including a performance of its first draft.

Inventing America: Making a Nation brings our Founding Fathers back to life in a TV talk show filmed before a live audience. This program features three delegates to the Second Continental Congress - Thomas Jefferson (Bill Barker), Benjamin Franklin (John Hamant) and John Adams (Sam Goodyear) - discussing the lead-up to the Declaration of Independence. A fourth delegate, John Dickinson (Rodney TeSlaa), who refused to sign the document, reveals the conflict behind this historic event. Created by Milton Nieuwsma and filmed by Philip A. Lane, two-time Emmy Award-winners from previous collaborations, the show was recorded at Hope College in Holland, Michigan. The host and moderator is Marc Baer, professor of history at Hope. The director is John K.V. Tammi, professor emeritus of theatre and founder of Hope's acclaimed Summer Repertory Theatre.

A follow-up to Inventing America: Making a Nation, Inventing America: Making a Government brings our Founding Fathers back to life in a TV talk show filmed before a live audience. This program tells the story behind the Constitutional Convention of 1787 - four momentous months that changed the world. James Madison, Alexander Hamilton, Benjamin Franklin, Gouverneur Morris

and George Washington discuss the conflicts and compromises that led to creating the world's most enduring republic. While imagined and presented as a retrospective, the conversation is based on fact, using the Founders' actual words. Created by Milton Nieuwsma and filmed by Philip A. Lane, two-time Emmy Award-winners from previous collaborations, the show was recorded at Hope College in Holland, Michigan. The host and moderator is Fred Johnson, associate professor of history at Hope College. The director is John K.V. That was the year the Chinese residents of Tacoma were forcefully expelled from the city  
against the backdrop of increasingly alarming and even violent tensions between American  
citizens caught in an economic downturn and Chinese immigrants seeking opportunity in  
"Gum

Reconciliation producer Forrest Burger traveled through six states to take an unflinching

immigrant populations provide relevant lessons in today's political climate, and in  
Tacoma's

The film chronicles pioneering attorneys, including twins Ruby and Ruth Crawford (who first began practicing law in the 1940s), as well as contemporary stories detailing the challenges that women in the legal profession still face today. Through interviews conducted over the past 20 years with Supreme Court Justice Ruth Bader Ginsburg and her daughter, Columbia law professor Jane Ginsburg; civil rights attorney Gloria Allred and her daughter, attorney and media figure Lisa Bloom; State Supreme Court and Appellate Court Justices; as well as female equity partners, women of color, young associates, and law-school students - the documentary examines a range of topics from discrimination and work/life balance to what it takes to become a partner in today's law firms. BALANCING THE SCALES also explores the persistent cultural bias that childcare is primarily a woman's role, and societal views about the value of care-giving vs. the value of professional careers. "Reinventing Cuba," goes beyond the stereotypes - beyond cigars and salsa, beyond mojitos and Malecon, beyond antique American cars and decaying architecture to reveal an extraordinary nation eager to embrace change. Host Gerry Hadden - a former PBS Latin America correspondent and long time Cuba watcher - takes viewers on a personal journey. He meets little league sluggers defying the odds and dreaming of the majors; doctors and medical researchers saving lives; hustlers finding ways around limited internet connections; artists and designers at the height of creativity; and black marketeers selling a vital entertainment and information device called "the package." One of the world's most precious resources is at risk. This timely and moving award-winning documentary by M. Sean Kaminsky illuminates what is at stake and what can be done to protect the source of nearly all our food: SEEDS. Seeds provide the basis for everything from fabric to food to fuel. Seeds are as essential to life as the air we breathe or water we drink...but given far less attention. According to the FAO (Food and Agriculture Organization of the UN), approximately 90 percent of the fruit and vegetable varieties that existed 100 years ago are gone. Meanwhile, GMO crops threaten traditional varieties via cross-contamination and patents prevent small farmers from breeding new varieties. Yet seed diversity is essential to grow food in our changing climate. Most people aren't aware of the challenges that face our seed supply. This film seeks to change that while empowering individuals to take seeds back into their own hands in ways both small and large.

younger? Would you like to feel and look younger by learning simple steps that make your heart younger? The science is clear that having a young heart leads to a young body. Just as your skin ages

and wrinkles, your heart can also show signs of aging. When you focus on ways to stay "young at heart," you improve the way you look, think, move, sleep, play, love, and live! America's Healthy-Heart Doctor, Joel Kahn, MD was originally trained to stop heart disease with angioplasty and pills. But after over 25 years as a cardiologist, he has witnessed the near-miraculous impact that diet, exercise, sleep, meditation and supplements have on the heart. According to Dr. Kahn, the vast majority of people who suffer from heart attacks, strokes and other heart-related deaths don't need to suffer all. More than 75 percent of disease diagnosis could have been prevented. The most potent medicines and treatments for heart disease are not found in a physician's office, pharmacy or hospital. They have less to do with technology, innovation or even medications but much more to do with what you think, do and eat. In this 60-minute program Dr. Kahn will present his secrets on how to create a whole body solution for a long and healthy life, reveal which simple test can show your real "heart age," and share his Ten Steps to a Younger Heart. Dr. Kahn is a graduate of the University of Michigan and has been practicing invasive, interventional and preventive cardiology in Detroit since 1990. He is a Clinical Professor of Medicine (Cardiology) at Wayne State University School of Medicine and Associate Professor of Medicine at Oakland University Beaumont Medicine.

totally gluten-free, low-carb lifestyle overnight. It takes commitment. It takes effort. But it's doable with the plan outlined in this program. More than a million people around the world have improved their health-physical, mental, and cognitive-thanks to Dr. Perlmutter's bestselling books, Grain Brain and Brain Maker. Now the time has come to bring these two forces together in a highly practical, step-by-step holistic lifestyle program. Welcome to Dr. Perlmutter's Whole Life Plan. Dr. Perlmutter puts his ideas into practice in the real world to show you that living your best life is about much more than what you put in your mouth. It expands upon the core advice in his previous programs and introduces exciting new information about the advantages of eating more fat and fiber, consuming fewer carbs and protein, evicting gluten forever, and catering to your intestinal flora. Food is a central component of the program, but so are other key aspects to achieving the best results: the timing of when you eat, sleep, and exercise; knowing which supplements to take and which medications to potentially drop; reducing daily stress and even chemical exposures in your physical environment; nurturing relationships and your own self-care; addressing the challenges in life with grace and ease; routinely creating goals for your personal development; and finding time for the kinds of physical activities that power the brain while healing the body. The program offers nutritional and health advice that's been validated over and over again in the scientific literature, but also more extensive science has emerged. Even the U.S. government has modified its dietary guidelines to reflect this research, backing away from endorsing low-fat, low-cholesterol diets. If you assume that this is just another diet that will test your willpower and resolve - it will disappoint you on that front. Dr. Perlmutter's Whole Life Plan gives you a jump-start to a healthy way of living that you will be able to sustain indefinitely.

It is possible to turn back time. You can reverse the signs of aging from the inside out. You don't have to live with aging skin and poor health as years tick by; fighting your genetic destiny is easier than you think. You can enjoy the most vibrant years of your life by treating yourself to the benefits of this easy-to-follow two-week, "Younger Skin from Within" program with Dr. Trevor Cates. With the anti-aging market expected to grow 7.8 % annually and be worth \$191.7 billion by 2019, there is no doubt many of us are looking for the secret to everlasting youth. Conventional skin care treatments usually start and stop with external treatment. Traditionally trained estheticians and dermatologists are missing the most important step - what's happening inside the body. The condition of our skin is a direct reflection of what's going on inside us. Getting to the root problem rather than suppressing symptoms is what truly helps heal the skin from the inside out. If you don't address the underlying cause, even more complicated health issues often arise. Dr. Cates looks at patients as people first, and doesn't simply focus on their skin conditions. For example, many conventional doctors put patients into boxes - "Fifty-six-year-old female with psoriasis", and then prescribe a topical treatment to attack a superficial condition. That approach doesn't take the whole picture into account, and it doesn't tackle what's really going on. During this program Dr. Cates discusses her unique perspective, giving each skin type a person's name, rather than labeling each as a disease. Through her sample skin quiz viewers start to understand how to identify their primary skin type, so that they can better address their root cause and start their journey to overall health and clear, younger-looking skin. This easy-to-follow, two-week program is different than any traditional treatment. It gets to the heart of the issues manifesting themselves as skin conditions, so they can be eliminated forever. We all have 14 days, and it's the perfect amount of time to press the reset button for our health for life. Incorporating Dr. Cate's 4Cs - Clean Plate, Clean Body, Clean Mind And Clean Slate - this program makes looking 10 or even 20 years younger possible. Your skin will begin to clear, you will feel better on the inside, and look

her more vibrant on the outside. Dr. Cates journey to PBS began as a child who struggled with health and skin. She's been there, and she's eager to share her success and insight with viewers. Dr. Cates' program promises to nourish your body, mind and soul during the two week, "Younger Skin from Within" transformation.

APTEX 00:56:46

COUNTING FROM INFINITY: YITANG ZHANG AND THE TWIN PRIME CONJECTURE centers on an exciting string of mathematical discoveries. It began in April 2013 when Yitang "Tom" Zhang, a virtually unknown mathematician working as an adjunct professor at the University of New Hampshire, submitted a paper to the Annals of Mathematics. Zhang had made an important breakthrough in Number Theory by solving the Twin Prime Conjecture (pairs of prime numbers that differ by two). His work, Small Gaps Between Primes, was immediately recognized as an important mathematical break-through, and Zhang became an instant celebrity - a role for which he was unprepared. The film documents Zhang's quiet perseverance amidst adversity, and his preference for thinking and working in solitude. Zhang's story is interwoven with a history of the Twin Prime Conjecture as told by several mathematicians, many of whom have wrestled with this challenging problem: Daniel Goldston, Kannan Soundararajan, Andrew Granville, Peter Sarnak, Enrico Bombieri and James Maynard. By chronicling the series of rapid developments around the twin prime problem in 2013, and the many individuals who contributed to it, the film offers a glimpse at how

mathematics progresses. A snapshot of a great moment in mathematical history,  
COUNTING FROM  
INFINITY is at once a biographical portrait of a unique individual and the exciting story of  
his discovery.

integral  
to what it means to be Hmong in America. The Hmong fought alongside American Soldiers  
and CIA  
operatives as a secret army in the Vietnam War. When the war was lost they faced a  
campaign of  
genocide. Many came as refugees to the United States. Despite this significance of Pa Dau to  
identity and cultural survival, the art form is disappearing. The perspective of the elder  
generation, the fighters and refugees from Laos, is expressed in their own Hmong language  
and  
their fear of cultural loss is immediate and painful. The story of Hmong Pa Dau is the story  
of  
identity change and perseverance, it is an exploration of the refugee and immigrant

and also a commentary on contemporary minority issues in America.

Escalation NETA 00:56:46

Escalation focuses on the growing U.S. involvement in Southeast Asia from the mid-50's and early 60's, a time when America sent 'military assistance and advice' to a beleaguered South Vietnam increasingly under attack by the Communist North. American involvement escalated dramatically after the first combat Marines arrived in 1965 and the bombing campaign known as Rolling Thunder began. Through first-hand accounts of the men and women who were there, the documentary explores how they flew the planes, cruised up the Mekong Delta, and slogged through the jungles and rice paddies to try to locate an elusive enemy. Veterans of the rear echelon describe how they supplied the mountains of materiel necessary to support the growing forces. Escalation also explores the new tactics our military used in this war to fight an almost unseen enemy, including the same guerilla tactics they employed, and embracing the groundbreaking technology of helicopter warfare.

Turning Point recounts the growth of American forces to over 500,000 troops by 1968, and how some Americans estimated the Communist enemy's days were numbered and the war would be over in months. Yet the shock of North Vietnam's massive Tet Offensive surprised and dismayed a public that was tiring of the weekly scene of flag draped caskets arriving at Dover, Delaware. Stories from Marines trapped in the deadly siege of Khe Sanh and of the terror of "walking point", when a soldier leads his squad into the jungle, highlight the danger and intensity of this phase of the war. Turning Point also explores the illogical set of rules of when, who, and how our troops could attack the enemy, a system that perplexed our men and women to no end. But the war also had its lighter moments when soldiers had a chance to kick back and relax. In this hour, veterans reminisce about going on R&R's - Rest and Relaxation breaks - in Hawaii, and how difficult it was to return. Soldiers also talk about nonsense games they created to beat the boredom. There were even rare moments of romance, and one soldier tells the story of how he fell hard for a South Vietnamese girl with whom he just celebrated their 42nd year of marriage!
